

POWER IN NUMBERS

As every engineer knows, there's power in numbers. Together with your classmates, make a class gift that opens doors for the next generation of engineers.

Reunions are milestones, an occasion for you and your classmates to commemorate and reflect on how U of T Engineering has impacted your life. Alumni Reunion presents a terrific opportunity to come together and give back to Skule™. Your class can help give the gift of a U of T Engineering education to our future engineers.

There are many ways that your class can make a lasting impact. The Advancement Team will help you every step of the way to make your class gift a reality. We can provide class lists, assist with outreach and more. Have other ideas? Let us know and we can help bring your class impact to life.

MAKE A REUNION GIFT

Make a reunion gift to a U of T engineering designation close to your heart. Whether it be support for our Faculty's most pressing needs, enhancements to your department's learning spaces, a boost for student clubs or student financial assistance – together your class can work toward a fundraising goal or focus on hitting a specific number of donations. Celebrating 20 years? Can your class raise 20 gifts? Or contribute \$20,000 as a group? Big or small, all gifts make a difference!

NAME A TABLE OR BENCH

Leave your mark on campus – literally! There are a variety of naming opportunities within our Faculty. You can dedicate a table or bench in the Myhal Centre for Engineering Innovation & Entrepreneurship where your class will be part of the central hub of student and Faculty activity for years to come. With a minimum investment of \$7,500, a table or bench will be dedicated with a plaque and inscription.

CREATE A NAMED STUDENT AWARD (SCHOLARSHIPS, BURSARIES & GRANTS)

Invest in the next generation of U of T engineers by giving our students the financial help they need to succeed, and let them know that alumni are cheering them on. As a class, you can design your own award terms to reflect your values and interests. You can establish an award for a finite time period or an award that lasts *in perpetuity*. There are also matching opportunities which can double your impact! With a minimum investment of \$12,500, your class will create meaningful and direct impact.
