

May 22, 2023

Dear Salutation,

Last spring, we introduced the Dean's Society to celebrate the alumni, parents, and friends who generously provide leadership annual support to the College of Medicine.

In total, 185 alumni, parents, and friends stepped forward, providing almost \$875,000 in flexible support for pressing needs across Einstein's campus. Gifts from these generous supporters were immediately put to use to supply cutting-edge technologies, support experiential learning opportunities, and advance the biomedical research happening in Einstein's laboratories. These investments impact the opportunity for breakthrough findings on a daily basis and help to shape not only Einstein's mission but also the future of medicine.

Salutation, I hope you will consider joining the Dean's Society this year with a leadership gift of \$1,500 or more to Einstein's Annual Fund. As a member, you will receive special invitations and research updates, as well as recognition on campus, at events, and on our website.

Perhaps more importantly, you will be a critical partner in our efforts to propel the work of innovative investigators who keep science at the heart of medicine. With your investment, together, we can maintain the level of excellence that makes Einstein a top destination for renowned faculty and researchers alike.

Thank you for your consideration,

Suzanne M. Murphy, Ed.D  
Vice President of Development  
Albert Einstein College of Medicine

P.S. Gifts can be made at one time or in monthly installments on our website at [www.einsteinmed.edu/deanssociety](http://www.einsteinmed.edu/deanssociety).

# The Dean's Society

Albert Einstein  
College of Medicine

We are pleased to recognize Dean's Society members with the following benefits:

- Invitations to the annual Dean's Society Honor Reception;
- Recognition on the Online Honor Roll and at events;
- Regular news and updates from Einstein;
- a personal liaison in the Office of Alumni and Development.

**Benefactor** → \$50,000+

**Founder** → \$25,000 - \$49,000

**Patron** → \$10,000 - \$24,999

**Sustainer** → \$5,000 - \$9,999

**Partner** → \$2,500 - \$4,999

**Associate** → \$1,500 - \$2,499

**Recent Graduates** → \$250 in the first five years after graduation

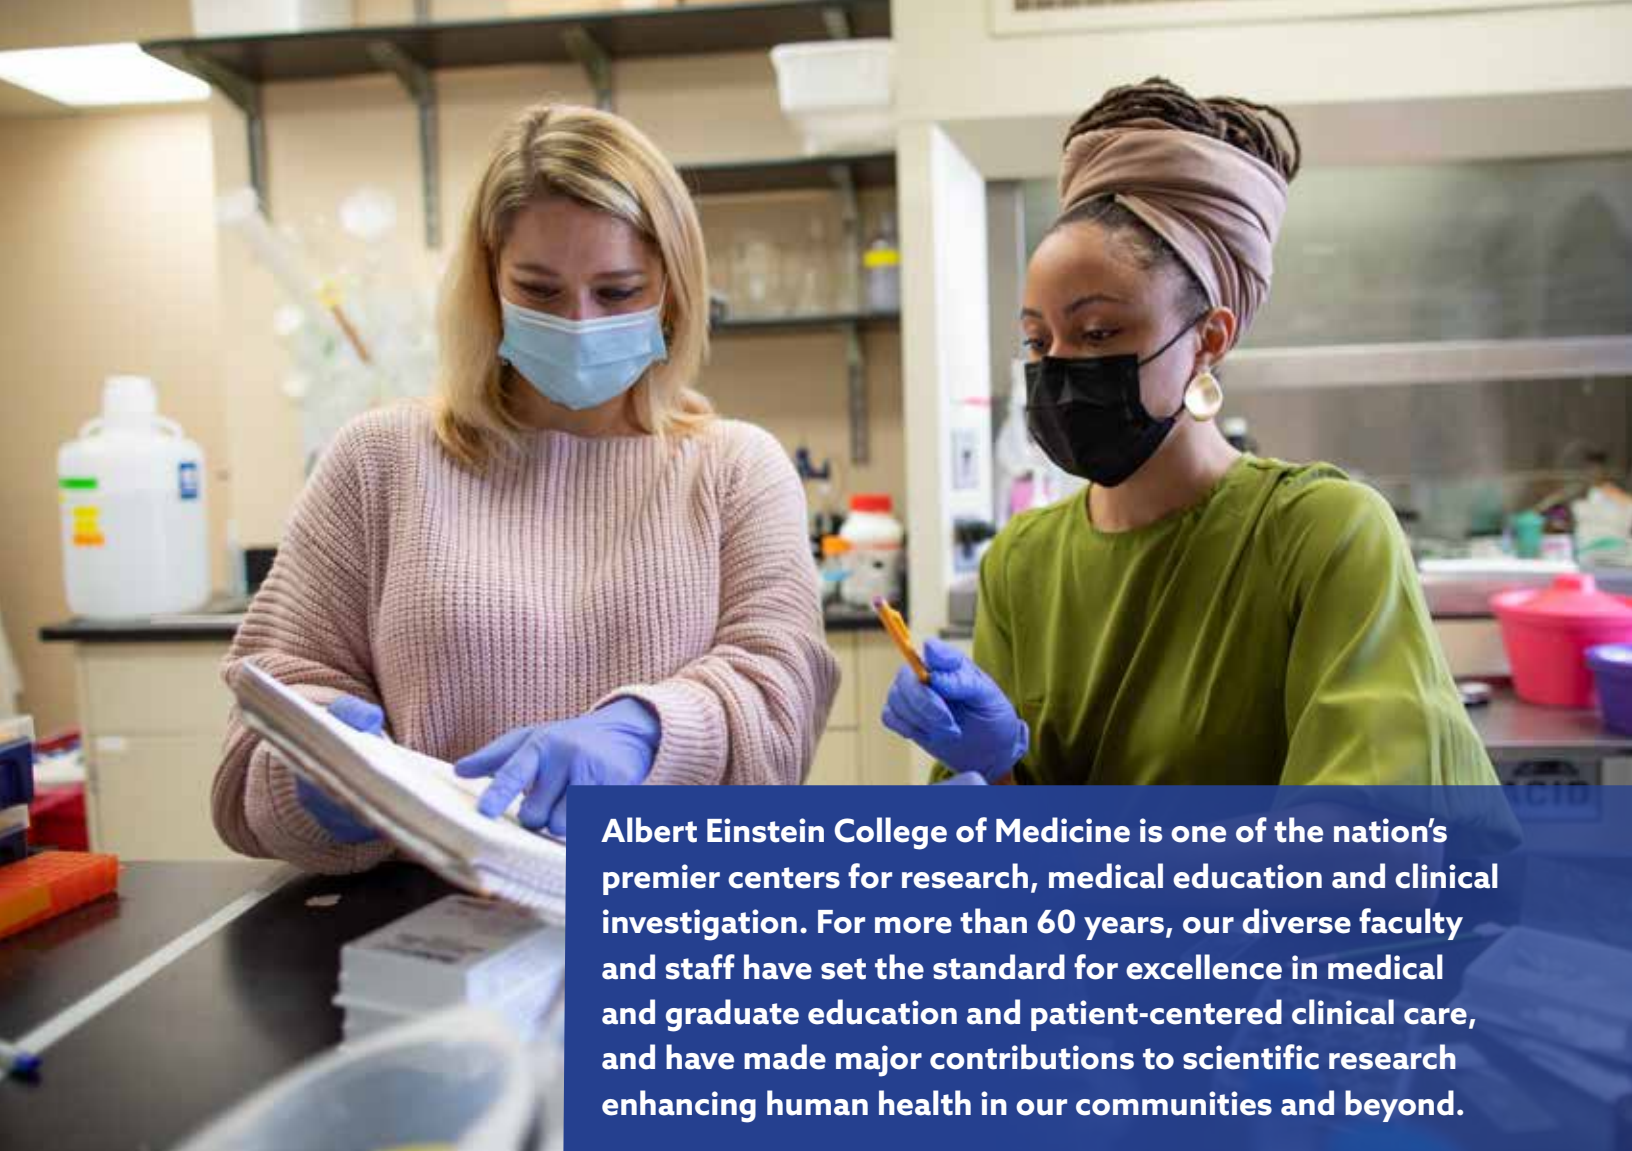

*Members at higher levels of the Society will enjoy increasing recognition for their support as well as special invitations to attend exclusive events and lectures throughout the year.*

Albert Einstein  
College of Medicine

A Proposal  
for Leadership  
Annual Support

**Albert Einstein College of Medicine is one of the nation's premier centers for research, medical education and clinical investigation. For more than 60 years, our diverse faculty and staff have set the standard for excellence in medical and graduate education and patient-centered clinical care, and have made major contributions to scientific research enhancing human health in our communities and beyond.**

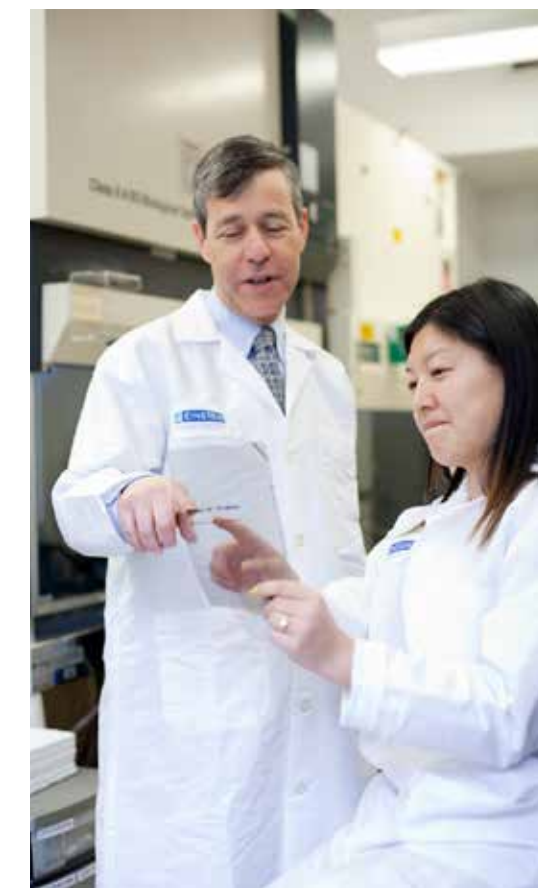

# Impact of Dean's Society Support

The Dean's Society recognizes donors making current-use gifts to Einstein each year. The impact of these donations can not be overstated, providing a "living endowment" which can be deployed immediately to address the most pressing needs of the College.

While tuition maintains our current programs, it does not always provide the flexibility to embark on new initiatives, pay for cutting-edge technologies and fund the research and student experiential learning opportunities that make Einstein a top destination for students and faculty alike.

Through their generosity, members of the Dean's Society help us to continuously refine our programs and invest in new opportunities without waiting for the budget to catch up. Every aspect of the Einstein education – from student scholarships and research to modernizing the curriculum and ensuring equitable access – is shaped by the partnership and investment of generous alumni, parents and friends.

### EXCELLENCE IN EDUCATION:

With over 1,900 full-time faculty members and more than 9,000 Einstein alumni counted among the nation's foremost clinicians, biomedical scientists and medical educators, Einstein offers one of the nation's largest programs for medical education. Today, the College of Medicine is home to over 1,050 M.D. or doctoral students, and 255 postdoctoral research fellows.

### RENOWNED FOR RESEARCH:

Long a national leader in biomedical research support from the Federal government, Einstein received more than \$202 million in funding from the National Institutes of Health during 2022. This includes the funding for major research centers at Einstein in aging, intellectual development disorders, diabetes, cancer, clinical and translational research, liver disease and AIDS. Other areas of focus include developmental brain research, neuroscience, cardiac disease, and initiatives to reduce and eliminate ethnic and racial health disparities.
