

It's hard to believe that it's been six years since you graduated from Embry-Riddle. We hope you're doing well! Each and every Eagle is a valued member of our community, and your journey is an important part of your story — and ours. We each had a unique journey that brought us to Embry-Riddle. Whether you jumped straight into college after high school or took a different path to earn your degree, we're glad we got to be a part of your history.

As you well know, Embry-Riddle remains as forward-thinking and driven as ever toward paving new pathways. From advancement in flight to exploration in space, we continue to be an industry leader in educating students in the aviation and aerospace industries. However, being innovators comes at a cost.

You know first-hand the expense associated with Embry-Riddle, but you also know how invaluable your degree is. State-of-the-art facilities, the industry's best professors, robust and competitive internship opportunities at some of the world's top companies — that's the Embry-Riddle promise. And it's a promise we hope to deliver to future Eagles for generations to come.

This year, your university is prioritizing access to scholarships. Will you join us in this mission? Your gift can help provide scholarships, resources and opportunities. No matter the size, every contribution counts and helps us create an even better experience for students today. If you're interested in giving back, please visit givingto.erau.edu/youngalumni.

Thank you for your generous support for Embry-Riddle Eagles near and far.

Together, we can make a lasting impact!

Shelia-Marie Stacy
Senior Director, The Annual Fund

“
I often find myself walking about campus, looking at the flight line and feeling the excitement that goes through my veins at the thought of my dreams becoming a reality. I'm aware that the financial resources that are made available by scholarships impact me directly, and for that I am very thankful. I hope someday to be one of those who shine as examples of what makes the Embry-Riddle community so special.”

Julian Segovia
Aeronautical Science Senior
